

Domain Leakage Service

Total Resilience highly trained security staff constantly scour the internet to identify data leaks associated with your business domains.

Our unique set of in house developed tools allow us to effectively scan large data sets of information on the internet in near real time to minimize the effects of a breach on your company.

Once a data leak has been detected Total Resilience staff alert you within 5 minutes and recommend corrective measures.

Alert: Account
John.Smith@yourcompany.com has been compromised via a data leak at Yahoo.

Action: Reset corporate account password immediately and notify user.
